

Welcome! A Virtual Tour Of Our Campus

Entrance

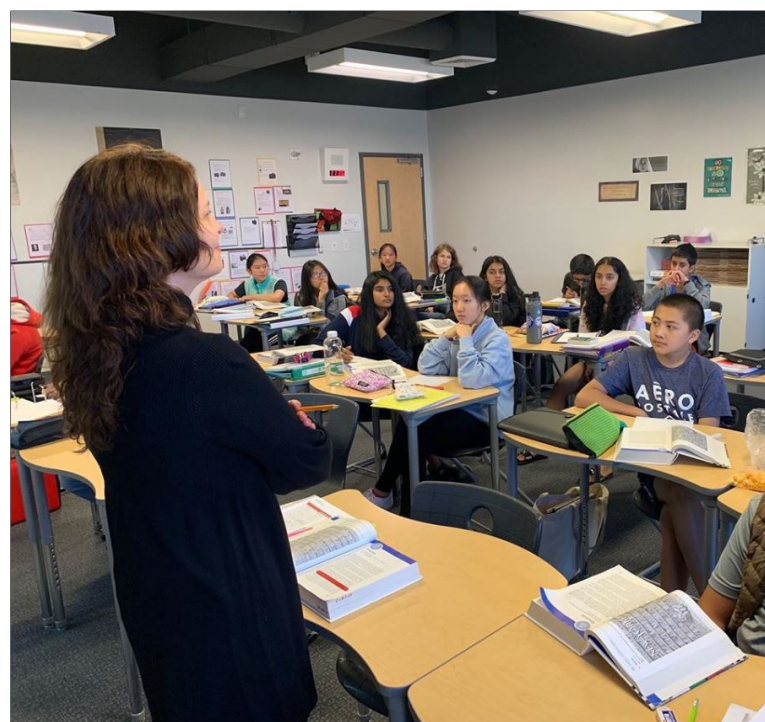

Families are greeted in our front lobby by one of our front office coordinators.

Members of the Administrative Team are also coming in and out of the front entrance, so you're bound to see one of them as well!

To help keep our Bobcats safe, entrance into our building requires a key card.

First Floor

Our campus is made up of students from grades 5 to 12. All 800 students travel from class to class every 50. No matter what your grade, you can expect to have a class on each floor!

Down here on the first floor, you'll find lockers for grades 5 and 6. You'll also find English, History, and Math classes.

Gym

Our gym is one of the most utilized rooms in our building. Not only is it home to our PE classes, but all of our home Basketball and Volleyball games are held in here. It is also used for parent sponsored luncheons, Pep Assemblies, Enrichment Nights, School Dances, and more!

Most importantly, it is open everyday for our Bobcats to use during their lunch hours.

Theatre

Another popular space on our campus is our Theatre. This space is used as a classroom for all our Drama classes, but it is also used for presentations, movie nights, Improv Hour, Music Galas, Admissions Events, and more!

It is also home to our Drama Club, who put on two big productions a year; one play and one musical.

Senior Lounge

We have a special place on campus for our seniors.

During their senior year, our oldest Bobcats have free periods, internship and research projects, college applications, and more!

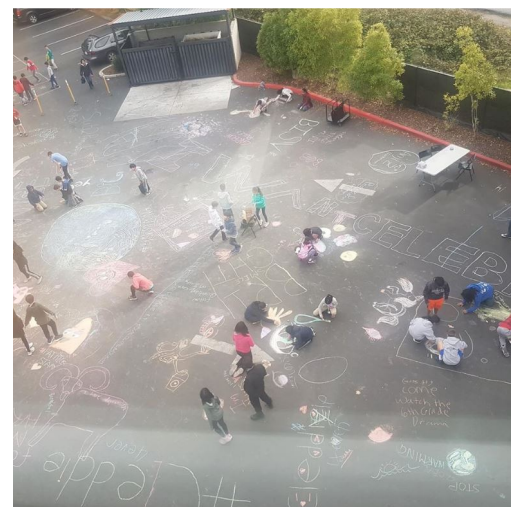

We love being able to provide a space for them, that's just theirs.

Outside

Our campus' outside area includes a grass area, half court, picnic tables, four-square court, and a grove.

The outside space is available to students for their lunch and after school activities. We often have students hanging outside with their friends after school or doing their homework.

Second Floor

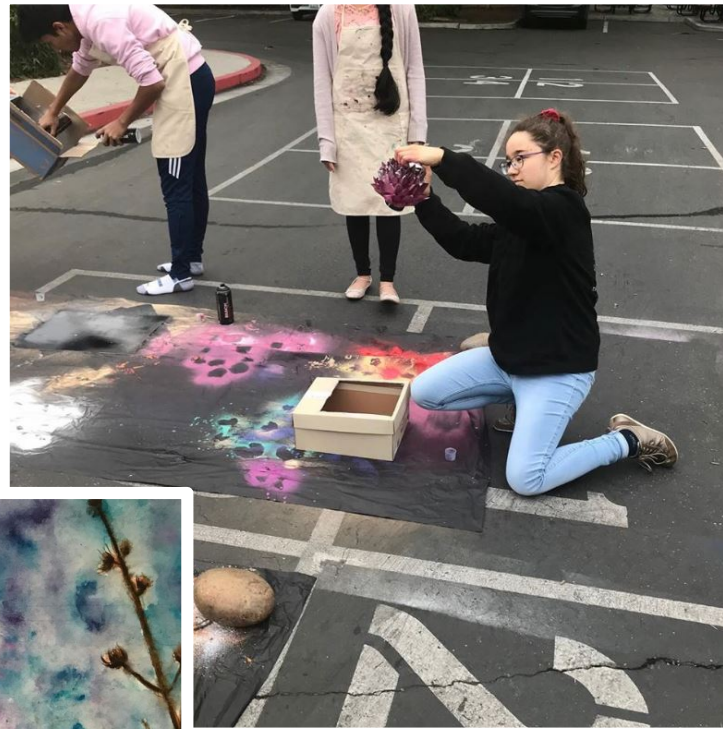

Similar to the first floor, you'll find various classrooms, labs, and lockers.

The second floor is also home to our Art Rooms, Music Rooms, Pottery Room, and Engineering Lab.

Lockers on this floor are primarily for grades 7 – 9.

Art Rooms

Our Art Rooms are used by students in grade 5, 6, and 7 in our Visual Arts Electives, along with our Upper School Electives, such as AP Art History and AP Art Studio. They even use the back lot for some of their bigger projects.

Their creations line our hallways throughout the year and we also get to enjoy a twice a year Art Gala.

Engineering Lab

Home to our Robotics Teams, the Engineering Lab is primary used for our Engineering & Technology Elective, along with some of our Physics and Math classes.

The room is set up as half classroom, half workroom. Often times there are inventions and ideas in motion!

Music Rooms

Whether students are interested in piano, band and orchestra, or choir, our students will be able to find like minded and passionate teachers in our music rooms!

Adjoining staff offices to the music rooms get to enjoy live performances throughout the day from these classes.

Third Floor

Not unlike the rest of our campus, our top floor is compromised of classrooms, and lockers. But this floor is home to our science labs, and cafeteria!

Lockers on this floor are home to our upperclassmen in grades 10 – 12.

Cafeteria

While some may enjoy their lunches outside, a common place for our students to gather at lunch is in the Cafeteria! School lunches are split into shifts by grade. Hot lunch service is in the Cafeteria, but students are welcome to pick up their lunch and head outside.

This past year we added ping pong tables to the Cafeteria, which has proved very popular!

Science Labs

Whether a student is in grade 5 Introduction to Science, or a grade 12 Science Capstone class such as Topics in Modern Physics or Biology of Cancer, they will find a majority of their science classes on the third floor.

These labs are always exciting to observe!
